

zoe / zoe outdoor design Lievore Altherr Molina (2006)

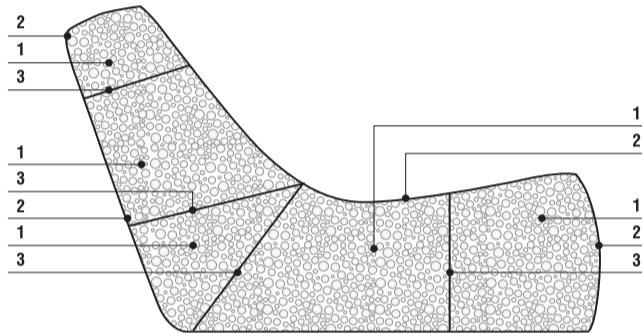

Caratteristiche: Zoe si distingue per il design informale e per il particolare comfort. La collezione è composta da poltrona Large, poltrona Small, Chaise Longue, poltrona Baby e da pouf di diverse dimensioni, disponibili anche in versione Outdoor. La fodera con cuciture "al vivo" si realizza solo con tessuti idonei (vedi listino prezzi) e con tutti i tipi di pelle. Con altri tessuti le cuciture saranno di tipo tradizionale con bordino dello stesso tessuto. Sconsigliamo i tessuti troppo leggeri. È completamente sfoderabile. Zoe è inoltre attrezzabile con il tavolino Argo e i tavolini Blog. Le misure riportate, essendo costruita con materiale "mobile", sono indicative. **Struttura:** Realizzata senza nessun telaio di sostegno, è modellata da una fodera in cotone 100% Twill, confezionata con camere separate, contenenti perline di polistirene espanso. Il numero delle camere varia a seconda della dimensione della poltrona: 6 nella chaise longue, 5 nella Large e nella Small e 3 nella Baby. Ogni camera è appositamente costruita con una cerniera provvista di tasca di sicurezza. Date le caratteristiche intrinseche del polistirene espanso, che non assicura costanza di densità, non è possibile garantire l'omogeneità di riempimento tra una poltrona e l'altra e si deve pertanto considerare accettabile una tolleranza di ± 5% del volume di riempimento. Le perline di polistirene espanso, con l'uso, possono perdere leggermente di volume; questo è normale. Il volume originale si può ottenere aggiungendo nuove perline di polistirene espanso in una o più camere. Nella versione Outdoor viene costruita con tessuti idrofughi, con fodera interna anche essa idrofuga, e cucita con filati speciali impotrescibili. Adatta ad un uso sottoportico può sopportare anche una pioggia non intensa.

Features: Zoe distinguishes itself for its comfort and its casual design. The collection includes: Large Armchair, Small Armchair, Chaise Longue, Baby Armchair and pouf in different sizes, available in Outdoor version too. The cover with visible seams can only be made with suitable fabrics (see price list) and with any kind of leather. If different fabrics are utilised, classic stitching in the same fabric will be made. We do not recommend fabrics that are too lightweight. The cover is fully removable. Zoe can be equipped with the small table Argo and Blog tables. As Zoe is made with "mobile" material, the sizes indicated are approximate. **Framework:** It is built with no supporting frame, is shaped by a 100% Twill cotton cover, and made with separate chambers, containing expanded polystyrene pearls. The number of chambers changes according to the size of the armchair: 6 in the Chaise Longue, 5 in the Large and in the Small and 3 in the Baby. Each chamber is made with a zip equipped with a safety pocket. In account of the specific characteristics of the expanded polystyrene, which does not assure a constant density, it is not possible to guarantee that each Zoe chair will have the same volume. Please allow a + or - 5% tolerance of the filling volume. With the daily use, the expanded polystyrene pearls might lose volume. This is also normal. Original volume can be obtained by adding new expanded polystyrene pearls to one or more chambers. In Outdoor version Zoe is delivered with water repellent fabrics, as well as with water repellent inner cover, covers are sewed with special mould resistant yarn. Suitable for screened-in porches use, it can stand a gentle rain.

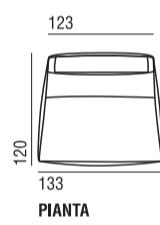

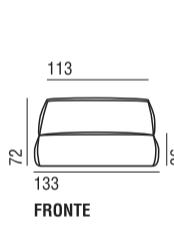

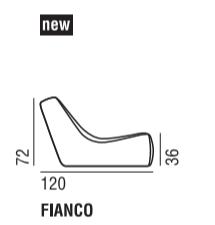

Eigenschaften: Zoe verbindet herrliche Bequemlichkeit mit seinem ungewöhnlichen Design. Large Sessel, Small Sessel, Chaise Longue, Baby Sessel und Hocker in verschiedenen Maßen (wegen des flexiblen Aufbaus handelt es sich nur um Richtwerte) garantieren eine umfangreiche Auswahl. Zoe ist auch für Outdoor zur Verfügung. Aus technischen Gründen bieten wir nur bei Verwendung der geeigneten Stoffen (siehe Preisliste) und aller Lederarten die attraktiven Sichtnähte an. Bei den anderen Stoffen werden herkömmliche Nähte mit Kanten aus dem gleichen Stoff verwendet. Naturgemäß sollten bei Zoe keine zu leichten Stoffe zum Einsatz kommen. Eine beliebte Ergänzung stellt der Tisch Argo und Tischlein Blog dar. **Struktur:** Ohne jeglichen Stützrahmen, geformt aus einem Bezug mit 100% Twill aus Baumwolle, mit abgetrennten Kammern, die mit Polystyrolkugeln gefüllt sind. Die Anzahl der Kammern hängt von dem Masse des Sessels ab: 6 bei der Chaise Longue, 5 beim Large und Small und 3 beim Baby. Jede Kammer ist mit Reißverschluss mit Sicherheitstasche versehen. Aufgrund der dem Polystyrolkugeln eigenen Charakteristika, die eine konstante Dichtigkeit nicht gewährleisten, ist es nicht möglich, die Homogenität der Füllung von Sessel zu Sessel zu garantieren; eine Toleranz von +/- 5% des Volumens der Füllung ist also akzeptabel anzusehen. Durch die tägliche Benutzung können die Polystyrolkugeln Volumen verlieren. Dies ist normal. Das originale Volumen kann, durch Wiederauffüllen mit Polystyrolkugeln in einer der Kammern erreicht werden. In der Outdoor Ausführung wird Zoe sowohl mit wasserabstoßende Stoffen als auch mit wasserabweisende Untenbezug geliefert. Der Bezug wird mit spezielles und unverwesliches Garn genäht. Zoe Outdoor eignet sich für die Nutzung im Freien, die Sessel halten Regenschauer aus.

SEZIONE SECTION SEKTION

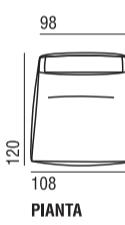

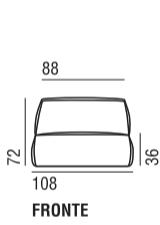

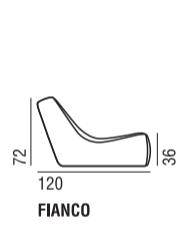

- 1: Perline di polistirene espanso.
Expanded polystyrene pearls.
Polystyrolkugeln
- 2: Cotone 100% twill.
100% Twill cotton.
100% Twill aus Baumwolle.
- 3: Trameze in cotone 100% twill.
100% Twill cotton tape.
Zwischenbänder aus 100% Twill aus Baumwolle.
